60 years and married to Karin. We have 3 children and 7 grand children.

Several years of experience with SAP BW/BI and ERP in large scale environment, working with daily operation. Both Unix, Windows and z/OS as operating systems, and SAP HANA, DB2, Oracle and MS SQL as backend databases.

As an integrated part of my job I used ITIL principles for incidents, request fulfillment, problems and change management.

Before I started as SAP Basis specialist, I also had a very long experience as database administrator with DB2 z/OS, DB2 UDB, Oracle, MS SQL – where I learned some very good techniques in SQL, and was part of data modeling team.

Also development in TransactSQL, PL/I, Cobol and Rexx is part of the toolbox. And the ETL tool DataStage.

For my private use I have good skills with WordPress, HTML, SEO and PhotoShop.

Timeline experience:

Oct 2018-current	IBM Denmark Aps - SAP Specialist SAP daily operation in an environment with ERP/ECC/BW/Portal with databases at SAP HANA, SAP ASE, DB2 z/OS and DB2 UDB. More than 300 systems in Linux/AIX environment managed in ITIL operation, with incident, service request and problem management. Many years of experience with tickets in POB and Servicenow. Highly skilled in HANA DB and performance mangement.
